PRODUCTS

THE PLUGSTER™

THE PLUGSTER™ is being used to promote electrical safety by the Lancashire Fire & Rescue Service, they are distributed to vulnerable residents in Lancashire.

THE PLUGSTER™ is also being distributed by Blackburn with Darwen Borough Council as part of a Falls Prevention Programme within the Borough.

THE PLUGSTER™

The elderly, frail & disabled are at risk of falls when removing plugs, when gripping & pulling a plug the balance is affected and if the grip slips then it can lead to them having a fall.

Appliances left plugged in at night are considered a potential fire hazard by fire brigades, they recommend that any appliance that does not need a constant electrical supply should be unplugged as a precaution.

THE PLUGSTER™

The moulded safety plug can be difficult for the elderly, frail or disabled to remove, fire brigades have on their websites noted that some people work the plug loose by pulling on the flex.

The Lancashire Fire & Rescue Service believe that vulnerable residents that have received THE PLUGSTER™ are more likely to unplug appliances when not in use, this will reduce risks & could help reduce energy wastage.

THE PLUGSTER™
